- ★ Did you have anything in common with Nadine?

### Mains 20 mins - choose ONE only

**MAKE..... 20 mins**  
Nadine has a very busy job where she receives a lot of information from a lot different places and people. Design an app or webpage for Nadine that would help her organise her day (you heard about her typical day in the video), and help her keep on top of all the information without having to use lots of different apps. In pairs come up with your app/webpage and sketch out some of the pages. (Remember to come up with a name for your app or webpage.) Present your ideas to the club.

**EXPLORE..... 20 mins**  
Some of Nadine's role involves helping engineers to problem solve issues with code, this means she needs to be a pro at coding. Spend these 20 minutes improving your coding skills. Head to [Codecademy](https://www.codecademy.com/) and choose a language you would like to learn more about.  
If you haven't coded before, try HTML. If you've done some coding before, try a new language.
